The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/554,003	Applicant(s) RENNER, DETLEF	
	Examiner DOUGLAS HESS	Art Unit 3651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 36 and 38-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan Abstract 01-254477.

See the PREVIOUSLY attached marked up drawing figure sheet (with figures 1 and 2) of Japan Abstract 01-254477(further referred to as JPN'477) depicting the claimed features.

JPN'477 teach the claimed invention except for showing the conveying of an actual gas turbine. Instead, JPN'477 teaches conveying a large vehicle frame . It would have been an obvious matter of design choice as to the type of article being conveyed and the mere claiming of a "generic gas turbine" does not provide a patentable departure over the device of JPN'477. The device of JPN'477 could clearly convey a gas turbine as claimed.

Regarding the argument about JPN'477 not having "a first section and a second section". The examiner's interpretation is dividing the conveyor in figure 1 in to halves and referring to the left side as a first section and the right side as the second section. JNP'477 is capable of running in either direction and raising and lowering an article in either section and/or in either direction. This interpretation meets the claimed language.
